

Reimagine Learning

Step into the future of CSI training with our brand new VR Training Simulation Platform.

RiVR CSI empowers users to create custom scenarios, transforming the learning experience. Our premier CSI library immerses you in the world of crime scene investigation with a suite of tools, environments, objects, and premade scenarios. Perfect for educators and trainers, RiVR CSI offers unparalleled realism and flexibility, enabling detailed performance monitoring and decision making analysis. Our software and accompanying website provide a complete package for mastering the art of crime scene investigation in a virtual world, ready to apply to real world training.

Wide array of Industry specific Tools to aid scene investigation.

Web based instructor interface for session monitoring and after action reporting

VR Tablet interface allows students to easily access all features of the platform from within the training environment

Create your own training scenarios with an extensive library of environments and objects

Create custom text, audio, and video briefings to introduce each scenario

Pre, post, and in scene quizzes, task lists and surveys

CREATE ■ TEACH ■ EVALUATE

Our web interface lets instructors set up sessions whilst monitoring students in real time. View the students timeline of actions and access all recorded media, such as photos, videos, and laser scans. Instructors can manage student classes, observe live sessions and review previous sessions.

Experience the future of training with our Fusion Kit **Classroom in a Box** solution.

Designed and manufactured in house, this state of the art kit allows you to take both passive and interactive training wherever you need to go. With the capability to house up to 10 headsets, it supports both remote and local modes, enabling your students to learn with you or independently.
