

The Classroom in a Box

RiVR is a renowned developer of Virtual Reality content and software, delivering immersive training for all industries.

RiVR Link 'classroom in a box' is a turn-key VR training solution. It gives a trainer simple tools to deliver an immersive lesson to all students, enhancing their knowledge retention and engagement.

VRchalk

Draw or use symbols to highlight key learning points in your content, visible to all headsets

Bookmark

Save specific moments of your content so you can instantly jump to it.

Remote

Connect multiple people to meet in VR and collaborate long distance by transmitting content in real time through the internet.

Local

Connect multiple people in a class to collaborate in VR by transmitting content in real time through the secure, built-in router.

Capture Kit

Professional capture kit that allows you to create your own custom content and load it directly onto RiVR Link.

Lecture Theatre

Engage with the students using the Webcam, Instant Message and 2-way communication.

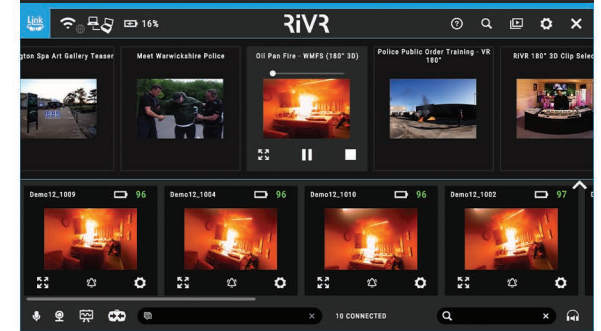

Content Library

Upload and manage your own content in 2D, 360° and 3D

Engaging, focused,
distraction free learning

"Our trainees were not engaged enough when being taught certain procedures in fire fighting, they were quickly forgetting some protocols. We reached out to RiVR for a solution and they suggested we use RiVR Link. We now train our staff in VR, not only has knowledge retention increased, but they are fully engaged, experiencing real environments we filmed ourselves."

Paul Speight, Watch Manager - LFRS

RiVR's Capture Kit provides you with all the equipment you'll need in order to film your own 360° content, which you can load directly onto your RiVR link kit.
